LEARNING JAVASCRIPT
THREE DAYS

Prerequisites

This course is intended for those who have a working knowledge of [Internet basics](#) and a basic understanding of scripting or programming concepts.

Who Should Attend

This course is for the Internet Web Publisher who wishes to add interactive and dynamic web pages.

Course Description

Learning JavaScript will enable the student to create web pages with embedded scripts. JavaScript allows the creation of dynamic web pages, and enables client side programming without CGI. JavaScript is the gateway to client side interactive web pages. This is a hands-on workshop.
